

ANGEO - Special Issue for ISEA-12

12th International Symposium on Equatorial Aeronomy (ISEA-12)

Editor(s): C. Haldoupis, J. Makela, E. Kudeki, J. Chau, D. Pancheva, and D. Hysell

PREFACE

1

The equatorial E-region and its plasma instabilities: a tutorial

D. T. Farley

Ann. Geophys., 27, 1509-1520, 2009

2

Spread F – an old equatorial aeronomy problem finally resolved?

R. F. Woodman

Ann. Geophys., 27, 1915-1934, 2009

3

On the origin of pre-reversal enhancement of the zonal equatorial electric field

M. C. Kelley, R. R. Ilma, and G. Crowley

Ann. Geophys., 27, 2053-2056, 2009

4

Counter electrojet features in the Brazilian sector: simultaneous observation by radar, digital sounder and magnetometers

C. M. Denardini, M. A. Abdu, H. C. Aveiro, L. C. A. Resende, P. D. S. C. Almeida, Ê. P. A. Olívio, J. H. A. Sobral, and C. M. Wrasse

Ann. Geophys., 27, 1593-1603, 2009

5

Signatures of 2-day wave in the E-region electric fields and their relationship to winds and ionospheric currents

H. C. Aveiro, C. M. Denardini, and M. A. Abdu

Ann. Geophys., 27, 631-638, 2009

6

Naturally enhanced ion-line spectra around the equatorial 150-km region

J. L. Chau, R. F. Woodman, M. A. Milla, and E. Kudeki

Ann. Geophys., 27, 933-942, 2009

7

Zonal asymmetry of daytime 150-km echoes observed by Equatorial Atmosphere Radar in Indonesia

T. Yokoyama, D. L. Hysell, A. K. Patra, Y. Otsuka, and M. Yamamoto

Ann. Geophys., 27, 967-974, 2009

8

E- and F-region coupling between an intense sporadic E layer and a mesoscale traveling ionospheric disturbance

W. E. Swartz, M. C. Kelley, and N. Aponte
Ann. Geophys., 27, 2475-2482, 2009

9

Topside measurements at Jicamarca during solar minimum
D. L. Hysell, J. L. Chau, and J. D. Huba
Ann. Geophys., 27, 427-439, 2009

10

Kelley and Dao
Solar wind-induced electric fields /

11

Equinoctial asymmetry of a low-latitude ionosphere-thermosphere system and equatorial irregularities: evidence for meridional wind control
T. Maruyama, S. Saito, M. Kawamura, K. Nozaki, J. Krall, and J. D. Huba
Ann. Geophys., 27, 2027-2034, 2009

12

Remote Oxygen Sensing by Ionospheric Excitation (ROSIE)
K. S. Kalogerakis, T. G. Slanger, E. A. Kendall, T. R. Pedersen, M. J. Kosch, B. Gustavsson, and M. T. Rietveld
Ann. Geophys., 27, 2183-2189, 2009

13

WN4 effect on longitudinal distribution of different ion species in the topside ionosphere at low latitudes by means of DEMETER, DMSP-F13 and DMSP-F15 data
L. Bankov, R. Heelis, M. Parrot, J.-J. Berthelier, P. Marinov, and A. Vassileva
Ann. Geophys., 27, 2893-2902, 2009

14

Comparing daytime, equatorial $\mathbf{E} \times \mathbf{B}$ drift velocities and TOPEX/TEC observations associated with the 4-cell, non-migrating tidal structure
D. Anderson, E. Araujo-Pradere, and L. Scherliess
Ann. Geophys., 27, 2861-2867, 2009

15

Spectra of equatorial total electron content derived from GPS signals
M. M. J. L. van de Kamp and P. S. Cannon
Ann. Geophys., 27, 2205-2214, 2009

16

The linear dependence of GHz scintillation on electron density observed in the equatorial anomaly
J. A. Whalen
Ann. Geophys., 27, 1755-1761, 2009

17

Storm induced large scale TIDs observed in GPS derived TEC
C. Borries, N. Jakowski, and V. Wilken

Ann. Geophys., 27, 1605-1612, 2009

18

Y. Migoya Orué, S. Radicella, and P. Coisson
Ionospheric storm effects observed using TOPEX TEC data

19

Effects of strong IMF B_z southward events on the equatorial and mid-latitude ionosphere
E. Astafyeva,
Ann. Geophys., 27, 1175-1187, 2009

20

Seasonal variability and descent of mid-latitude sporadic E layers at Arecibo
N. Christakis, C. Haldoupis, Q. Zhou, and C. Meek
Ann. Geophys., 27, 923-931, 2009

21

Semidiurnal tidal signature in sporadic E occurrence rates derived from GPS radio occultation measurements at higher midlatitudes
C. Arras, C. Jacobi, and J. Wickert
Ann. Geophys., 27, 2555-2563, 2009

22

Magnetic-inclination effects in the spectral resonance structure of the ionospheric Alfvén resonator
T. Bösinger, E. N. Ermakova, C. Haldoupis, and D. S. Kotik
Ann. Geophys., 27, 1313-1320, 2009

23

Diurnal variation of non-specular meteor trails
J. Hinrichs, L. P. Dyrud, and J. Urbina
Ann. Geophys., 27, 1961-1967, 2009

24

First meteor radar observations of tidal oscillations over Jicamarca (11.95° S, 76.87° W)
L. Guo and G. Lehmacher
Ann. Geophys., 27, 2575-2583, 2009

25

Radar cross sections for mesospheric echoes at Jicamarca
G. A. Lehmacher, E. Kudeki, A. Akgiray, L. Guo, P. Reyes, and J. Chau
Ann. Geophys., 27, 2675-2684, 2009

26

Accuracy issues of the existing thermospheric wind models: can we rely on them in seeking solutions to wind-driven problems?
M. F. Larsen and C. G. Fesen

Ann. Geophys., 27, 2277-2284, 2009

27

Overturning instability in the mesosphere and lower thermosphere: analysis of instability conditions in lidar data

L. Hurd, M. F. Larsen, and A. Z. Liu

Ann. Geophys., 27, 2937-2945, 2009

28

Seasonal variations in gravity wave activity at three locations in Brazil

B. R. Clemesha, P. P. Batista, R. A. Buriti da Costa, and N. Schuch

Ann. Geophys., 27, 1059-1065, 2009

29

D. Simkhada, J. Snively, M. Taylor, and S. Franke

Ducted and Evanescent Gravity Waves

30

Spectral wave analysis at the mesopause from SCIAMACHY airglow data compared to SABER temperature spectra

M. Ern, C. Lehmann, M. Kaufmann, and M. Riese

Ann. Geophys., 27, 407-416, 2009

31

Nonmigrating tidal activity related to the sudden stratospheric warming in the Arctic winter of 2003/2004

D. Pancheva, P. Mukhtarov, and B. Andonov

Ann. Geophys., 27, 975-987, 2009

32

Nonmigrating tidal signals in the upper thermospheric zonal wind at equatorial latitudes as observed by CHAMP

K. Häusler and H. Lühr

Ann. Geophys., 27, 2643-2652, 2009

33

Stormtime dynamics of the global thermosphere and equatorial ionosphere

W. J. Burke, C. Y. Huang, and R. D. Sharma

Ann. Geophys., 27, 2035-2044, 2009
